## THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT  
FOR THE PROPOSED CHANGE OF USER FROM  
AGRICULTURAL TO RESIDENTIAL-L.R.No 597316 KAIYA,  
KIAMBU

## INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed change of user from agricultural to residential on L.R. No. 597316 Kaiya, Kiambu County.

The Proponent (Mhasibu SACCO Limited) of the proposed change of user from agricultural to residential is proposing to construct residential units for the members of Mhasibu Runda Welfare Association.

The following are the anticipated impacts and proposed mitigation measures:

<i>Possible Impact</i>	<i>Mitigation measures</i>
Noise and excessive vibration	<ul style="list-style-type: none"> <li>• Using equipment with noise suppressing technologies.</li> <li>• Providing workers with PPEs against noise e.g. ear plugs.</li> <li>• Placing signs around the site to notify people about the noisy conditions.</li> <li>• Regular maintenance of equipment to ensure they remain efficient and effective.</li> <li>• Complying with the EMCA noise regulation Legal Notice 61.</li> <li>• Construction works should be carried out only during the specified time which is usually as from 0800 hrs to 1700 hrs.</li> </ul>
Change in surface & sub-	<ul style="list-style-type: none"> <li>• Changing the characteristics of the</li> </ul>

surface hydrology

project site from its present state to a more built state and changing the soil's characteristics, the proposed project will lead to a change in the water regime at the project site.

- The wastes from the construction activities also pose a threat to the quality of water that will be drained from the site through run-off and this may pollute aquifers and River Ruaraka.

Soil erosion and compaction

- Excavation may lead to losses in the accumulated soil carbon.
- Compacting the soil to lay the foundation, erecting temporary structures, and also from the heavy vehicles (trucks, tractors etc.) can reduce the soil's percolative ability and thereby increasing run-off.

Effect on landscaping and aesthetics

- Landscaping with indigenous species on completion of construction.
- Maintaining of landscaped gardens, terraces, conservation and management of the vegetation and gardens.
- Clearing vegetation only in construction areas and demarcating areas where no clearing will happen.

Air and dust pollution

- Sprinkling water on the soil to prevent dust from rising.
- Creating specific paths for the trucks
- Providing soil erosion control structures on the steeper areas of the site & controlling activities during the rainy season.
- Enclosing the structures under construction with dust proof nets.

Water quality (effluent discharge)

- Drainage channels should be installed in all areas that generate or receive surface water such as car parking, driveways and along the building block-edges of the roofs.
- Paving of the side walkways, driveways and other open areas should be done using pervious materials such as cibro blocks to encourage water recharge and reduce run-off volume.

Socio-economic impacts

- Integrating and implementing Equal Opportunity Principles in Procurement and human resource policies.
- Promoting social cohesion and integration among people in the area.
- Creating awareness towards the diversity of cultures and different economic background of the people in the project staff and residents through sensitization.
- Allowing the residents and businesses to form social groups and networks that build social capital.
- Targeting social investment programs towards the local communities and region.

Security

- Employing of security guards/competent security firm at the site and searching all vehicles and people entering the project
- Use of CCTV cameras to monitor security within the site
- Collaborating with the national police on security matters
- Placing alarms around the project and establishing emergency preparedness and response procedures

- Occupational health and safety
- Employing and EHS/OSH plan.
  - Provision of PPEs to all personnel working in potentially hazardous areas or with potentially hazardous equipment, and replacing the PPEs on wear and tear.
  - Placing readable signs alerting people of hazardous such as for slippery floors.
  - Servicing equipment and machine to ensure efficiency.
  - Providing fire-fighting equipment and maintaining them to ensure they are fully functional.
  - Delineating fire and emergency assembly points and creating awareness to ensure all people at site are aware of them, e.g. through the use maps on elevators, staircases etc.
  - Putting in place an ERP and ensuring all people in the project are aware of it and the procedures to follow commensurate to the level of emergency.
  - Providing adequate storage for hazardous and flammable substances and controlling access to them.

The full report of the proposed project is available for inspection during working hours at:

(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.

(b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi.

(c) County Director of Environment, Kiambu County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT  
FOR THE PROPOSED CONSTRUCTION OF TWO NEW DIESEL  
BULK STORAGE TANKS IN TECAFLEX FUEL DEPOT-  
MBARAKI MOMBASA

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of Environmental (Impact Assessment and Audit) Regulations, the National Environmental Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the implementation of the proposed construction of two new diesel bulk storage tanks in Tecaflex fuel depot- Mbaraki Mombasa.

The Proponent (Tecaflex Limited) of the proposed Construction of two new diesel bulk storage tanks is proposing to construct two vertical on-ground bulk diesel storage tanks, each having a storage capacity of 2,000M<sup>3</sup>.

The following are the anticipated impacts and proposed mitigation measures:

Possible Impact	Mitigation measures
High demand of raw material	<ul style="list-style-type: none"> <li>• Source building materials from local suppliers who use environmentally friendly processes in their operations</li> </ul>

- Ensure accurate budgeting and estimation of actual construction material requirements to ensure that the least amount of material necessary is ordered.
  - Ensure that damage or loss of materials at the construction site is kept minimal through proper storage
  - Use at least 5%-10% recycled, refurbished or salvaged materials to reduce the use of raw materials and divert material from landfills
- Increased solid waste generation
- Provide facilities for proper handling and storage of construction materials to reduce the amount of waste caused by damage or exposure to the elements
  - Use building materials that have minimal or no packaging to avoid the generation of excessive packaging waste
- Dust emission
- Ensure strict enforcement of on-site speed limit regulations
  - Where possible, avoid excavation works in extremely dry weathers
  - Sprinkle water on graded access routes when necessary to reduce dust generation by construction vehicles
  - Personal Protective equipment to be worn
- Noise and vibration
- Sensitize construction vehicle drivers and machinery operators to switch off engines of vehicles or machinery not being used.
  - Sensitize construction drivers to avoid gunning of vehicle engines or hooting especially when passing through sensitive areas such as churches, residential areas and schools
  - Ensure that construction machinery are kept in good condition to reduce noise generation
  - Ensure that all generators and heavy duty equipment are insulated or placed in enclosures to minimize ambient noise levels.
  - The noisy construction works will entirely be planned to be during day time when most of the neighbours will be at work.
- Increased energy consumption
- Ensure electrical equipment, appliances and lights are switched off when not being used
  - Install energy saving fluorescent tubes at all lighting points instead of bulbs which consume higher electric energy
- Health and safety
- All workers must be provided with the necessary protective gears; Ensure all workers are in protective gears all the time when on site; Place fire extinguishers in strategic areas within the depot; Designate and mark smoking areas;
  - Workers to be trained as fire marshals
  - Fire escape routes to be shown clearly
  - Provide enough first aid kits within the facility and have at least workers trained in first aid administering
  - Emergency telephone numbers should be well displayed
- Fire protection
- Regular inspection and servicing of the equipment must be undertaken by a reputable service provider and records of such inspections maintained
  - Firefighting equipment such as fire extinguishers should be provided at

- strategic locations such as stores and construction areas.
- High Water Demand
- Signs such as "NO SMOKING" must be prominently displayed within the premises, especially in parts where inflammable materials are stored
  - Promptly detect and repair of water pipe and tank
  - Sensitize clients to conserve water
  - Ensure taps are not running when not in use
  - Install water conserving taps that turn-off automatically when water is not being used
  - Install a discharge meter at water outlets to determine and monitor total water usage
- Spills
- Take steps to prevent leaks and spills. Keep machinery, equipment containers, and tanks in good working condition and be careful when transferring used oil. Have sorbent materials available on site.
  - If a spill or leak occurs, stop the spill from flowing at the source. If a leak from a container or tank can't be stopped, put the product in another holding container or tank.
  - Contain spilled products. For example, containment can be accomplished by erecting sorbent berms or by spreading a sorbent over the spill; Develop a spill response action plan; Remove, repair, or replace the defective tank or container immediately; All grounds should be cemented to prevent spills from leaking into underground water
  - Do not discharge petroleum products to sewers, drainage ditches, septic tanks, or streams.
  - Do not dispose of petroleum products in landfills or mix them with wastes that will be disposed of in landfills.
  - Do not mix petroleum products with cleaning solvents. The resulting mixture may be a hazardous waste.
  - Do not use petroleum products for road oiling, dust control, weed control or for similar purposes.
  - Keep storage containers closed when not actively adding or removing material-When storing drums keep an aisle space between drums to allow for inspection for leaks and damage.
  - Install secondary containment to prevent the release of petroleum products to the environment-Inspect containers and secondary containment structures on a weekly basis to be certain that they are in good condition. Keep written records of these inspections
  - Cement all ground in the depot to avoid leakage of petroleum products into underground water or contamination of soil; Have good plans of emergency cases of spill; Train all staff on hazard recognition, response plan implementation, safety, and clean up procedures, and reporting

The full report of the proposed project is available for inspection during working hours at:

- (a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (b) Permanent Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30521, Nairobi.

(c) County Director of Environment, Mombasa County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.
