25. (1) Every Member and member of Staff shall declare any conflict of interest regarding any matter which he or she is dealing with at the Authority;

(2) A Member or Staff who fails to declare a conflict of interest or who knowingly makes a false or misleading declaration regarding a material fact of a conflict of interest, shall be in breach of this Code.

(3) In the event that a member or Staff identifies a conflict of interest regarding any matter that is before or may come before the Authority, such Staff shall disclose it and thereafter refrain from taking part in its consideration or determination.

(4) Where a member or Staff is required by this Code to report a matter in regard to this section of the Code, such member or Staff shall submit a written report to his or her supervisor, who shall retain a permanent record of the report.

(5) Where a Member or Staff of the Authority is present at a meeting, where an issue which is likely to result in a conflict of interest is to be discussed, the member or staff shall declare the interest at the beginning of the meeting or before the issue is deliberated upon.

(6) A declaration of a conflict of interest under subparagraph (a) shall be recorded in the minutes of the meeting

(7) Upon receipt of the report under subparagraph (4), the supervisor shall refer the matter to the Director-General for a resolution.

(8) When a matter has been referred to the Director-General for resolution pursuant to subparagraph (7), the Director-General shall either—

(a) dispose of the matter; or

(b) refer the matter to the Authority for resolution where no resolution was reached.

(9) In the event that the Director-General, or, upon his or her referral under sub-paragraph (6), the Authority finds that a matter requires remedial action, the Director-General or the Authority, as the case may be, may require the Staff—

(a) to divest the conflicting interest; or

(b) to assign those duties that are in conflict to another Staff where appropriate, either temporarily or permanently.

(10) In the event that a Member of Staff refuses or is unable to divest the interest identified in subparagraph (7), the Authority shall, after determining that no other remedial action will be consistent with the Act and the requirements of this Code take appropriate action against such Staff.

26. (1) The Authority shall establish a Register of conflicts of interest to be maintained by the Director-General or Officer designated by him, stating the nature and extent of the conflict.

(2) For purposes of subparagraph (1), the register shall comprise of declarations of conflict of interest.

(3) The Authority shall keep the register of conflicts of interest for a period of five years after the last entry in each volume of the register.

THE ENVIRONMENTAL MANAGEMENT AND
CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED SEWERAGE EXPANSION AND
REHABILITATION PROJECT FOR KERICHO TOWN IN
KERICHO COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Lake Victoria South Water Services Board (LVSWSB)) is proposing Expand and Rehabilitate the Kericho Town sewerage system. Kericho Town is located in Kericho County, Rift Valley in Kenya on the National trunk road (B1) that connects Nakuru, Kisii and Kisumu

The proposed sewer expansion will involve rehabilitation of the existing treatment works

and the expansions will pass through, KIE, Satellite motobo, Swahili, Midwest, CBD, Site Service and Nyagacho area all located within Kericho municipality. The following are the anticipated impacts and proposed mitigation measures:

*Impacts**Mitigation measures*

Air pollution and foul smell

- Inform the Majengo, Site and Service Estates prior to start of work.
- Flushing of all sewer/ waste water within a sewer line before exposing it in the open during the rehabilitation activities (replacing of pipes).
- Minimizing the number of motorized vehicles on use.

Noise pollution

- Wet all active construction areas and when necessary to lay off dust.
- Provide nose masks to workers to protect them from dust emissions and other toxic gaseous materials.
- For the long term air pollution impact of the sewer treatment plant, the LVSWSB should ensure that the current site is relocated at the later phases of the project, due to the proximity to the Kericho Sub-County Hospital.
- Avoid night time construction when noise is loudest.
- Conduct periodic noise measuring and monitoring to determine levels and extent of harmful noise.
- Clearly label the high noise areas.
- Provide PPE (hearing protection) to persons operating within or visit identified high noise areas.
- In order to meet noise level requirements, the equipments should be equipped with standard noise attenuation features. Machines that exceed acceptable noise limits should be equipped with silencers or lagging materials or specially designed acoustic enclosures.
- Inform local residents when construction activities are likely to generate excessive noise in order to minimize disruption to local residents.
- Sensitize truck drivers to switch off engines while offloading materials; to avoid gunning vehicle engines or hooting especially when passing through sensitive areas such as churches, residential areas and hospitals (Kericho District Hospital neighbouring the treatment plant).
- Excavated channels to follow contours to avoid interference with surface drains.
- Whenever necessary, drains along the construction line are directed towards existing drainage systems to cater for storm water during the rains. However, construction should be carried out during a dry season and should take the shortest period possible.
- Utilise excavated soil to level excavated ground where necessary and cover the sewer lines that will have been laid in the ground.
- Construction materials and other debris (lime, cement and fresh concrete,) should be handled carefully to prevent them from finding their way into the nearby water sources such as Dionyoset River (Buffalo River).
- Ensure compliance with environmental laws.
- The structures to be developed should be aesthetically acceptable to blend in with the surrounding.
- The proponent shall as much as possible complete the works in such a way that natural aesthetics shall be retained at the locations. Restoration shall be undertaken to ensure that the original setting is as much as possible retained.
- A site waste management plan should be prepared by the contractor prior to commencement of construction works. This should include designation of

Drainage and hydrology

Interference with physical setting

Solid waste management

	<p>appropriate waste storage areas, collection and removal schedule and identification of approved disposal site.</p> <ul style="list-style-type: none"> • Unusable construction waste, such as damaged pipes, formwork and other construction material, must be disposed off at an approved dumpsite. • Proper solid waste receptacles and storage containers should be provided, particularly for the disposal of lunch and drink boxes so as to prevent littering of the site. • Arrangements should be made for the regular collection of litter and for its disposal with the County Government of Kericho. • Ensure that the solid waste collection, segregation, and disposal system is functioning properly at all times during the construction phase. • Recycle and re-use wastes where possible such as scraps metal. 		<p>promptly replaced; Regular monitoring and sampling of the waste water at influent and effluent points as well as in the receiving water bodies</p> <ul style="list-style-type: none"> • Communities living within the river basins where the trunk sewers will be constructed should be enlightened on dangers of using raw sewerage to irrigate farmlands.
Vegetation clearing, soil erosion and sedimentation	<ul style="list-style-type: none"> • Re-plant the indigenous vegetation as much as practical once work is completed. • Limit vegetation clearance unless where unavoidable circumstances appear. • Contain excavated soils so that they will not find their way into nearby water sources. • Cement mixing should be done in a designated area away at a safe distance from storm water drains. • Spilled cement or concrete should be collected and disposed away from natural water ways or storm water drainage. • Sensitise workers and enable them to properly handle concrete spillages or waste cement. • Re-vegetation of exposed areas around the site should be carried out rapidly in order to mitigate against erosion of soil through surface water runoff and wind erosion. 	Noise and vibration	<ul style="list-style-type: none"> • Ensure scheduled demolition timing is observed; • Contractor to give timely prior information to stakeholders and neighbouring institutions such as the Kericho District (County) Hospital of the schedule. <p>The full report of the proposed project is available for inspection during working hours at:</p> <p>(a) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. O. OUMA, <i>for Director-General,</i> <i>National Environment Management Authority.</i></p>
Occupational health and safety concerns	<ul style="list-style-type: none"> • Ensure that all construction machines and equipment are in good working conditions to prevent occupational hazards. • Establish a Health and Safety Plan (HASP) for both civil and Electromechanical work. • Appoint a trained health and safety team for the duration of the construction work. • Use of dust masks while working in dusty environment • Provide workers with gloves, ear gears, sturdy rubber boots and overalls to protect their skin from the effects of cement; • Provide workers training on safety procedures and emergency response such as fire, oil and chemical spills, pipe bursts and other serious water loss risks. • Develop a plan on how to handle the raw sewage during the construction phase. 		
Risks of overflowing manholes due to blockage of sewers	<ul style="list-style-type: none"> • Regular inspection of the system to ensure performance is maintained at high levels; • Blockages should be detected and 	Open trenches hazardous to individuals	<ul style="list-style-type: none"> • Backfilling temporary trenches as soon as their need are no longer required

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT FOR THE PROPOSED INTEGRATED DEVELOPMENT IN KITENGELA, KAJIADO COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Alexander Forbes, Retirement Fund) is proposing a development comprising of 151 No. massionettes in four courts covering 18.3 acres, 48 No. three-bedroom apartments and 12 No. two bedroom apartments in 2.5 acres, a shopping centre on 2.2 acres, community and utility facilities on 1.4 acres and an undeveloped riparian zone of 2.4 acres. In total the built up areas will take up about 50,000 m² of land. The entire development will be secured by a perimeter wall.

The following are the anticipated impacts and proposed mitigation measures:

<i>Impacts</i>	<i>Mitigation measures</i>
Vegetation loss due to clearance of site	<ul style="list-style-type: none"> • The clearance of the site for construction purposes should be kept to a minimum.
	<ul style="list-style-type: none"> • Instruct all construction workers to restrict clearing to the marked areas and not to work outside defined work areas.
	<ul style="list-style-type: none"> • Rehabilitate all disturbed areas by planting vegetation cover and reforestation especially along the River Kisaju riparian zone.
Open trenches hazardous to individuals	<ul style="list-style-type: none"> • Backfilling temporary trenches as soon as their need are no longer required

- Warning signs at both deep and shallow trenches especially at the shopping centre construction site that may require deep excavations.
 - Construct oil and water interceptors to capture discharge of oils, fuels and other polluting liquids at the workshop.
 - Ensure proper handling of lubricants, fuels and solvents while maintaining the equipments.
 - Surface runoff to be controlled by provision of retention areas.
 - A safety and emergency response plan to be developed for all operations with emphasis on the protection of the environment.
- Soil, water and groundwater contamination
- Bins should be strategically placed within the construction site. They should also be covered to prevent access by vermin and minimize odours.
 - The bins at both the campsite and construction site should be emptied regularly to prevent overflowing.
 - Use of cleaner technologies / generation to minimize on generation of solid wastes.
 - A waste management plan to be developed to handle temporary storage, transport and disposal of all kinds of waste.
 - Solid waste should be recycled, reused and utilized in an environmentally acceptable manner where possible.
 - Use a registered waste handling contractor to manage solid waste at the site.
- Solid waste generation which pollutes the environment may cause water borne diseases
- Maintaining machines at manufacturers specifications.
 - Site roads should be dampened within reasonable time to prevent dust nuisance.
 - Cover or wet construction materials such as sand to prevent dust nuisance. Also minimize cleared areas to those that are needed for construction.
- Gaseous emissions which pollutes air causing respiratory problems (SO, CO, NO)
- Construct a water treatment system and direct all black water into the system
- Liquid waste generation resulting into
- Use grey water for landscaping and gardening.
 - Do not discharge water into River Kisaju at all times.
- Soil and water contamination
- Traffic management plan to provide for safe and efficient movement of traffic into and out of the structure.
 - Provide acceleration and deceleration lanes.
 - Strict adherence to traffic code of conduct and the traffic police should ensure compliance.
 - Erect appropriate warning signs on approaches to the site access.
- Traffic disruption and inconveniences

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (National Oil) proposes to construct the following infrastructure:

Restaurant, Prayer room, Rainwater storage underground tank, Elevated water tank, Biodigester, Convenience shop, Borehole, Shops, Bank space, Office block for service station Service bay, Wash bay, Tyre centre, LPG storage Compressor/Generator room and Lube store.

The following are the anticipated impacts and proposed mitigation measures:

<i>Environmental Impacts</i>	<i>Mitigation Measures</i>
Geology and soils	<ul style="list-style-type: none"> • All quarry sites shall be clearly indicated on the plan and approved by the local authority for use. • To prevent erosion all non-built up areas should be landscaped.
Decreased water quality	<ul style="list-style-type: none"> • Ensure all spills from the construction plant are cleaned and treated before discharge.
Air quality	<ul style="list-style-type: none"> • Develop and implement effective measures for minimization of dust, ensure the construction equipment is in good condition.
Increased fugitive dust emissions	<ul style="list-style-type: none"> • Ensure that construction and demolition take into account the need to prevent and minimize release of fugitive.
Air pollution from incidents	<ul style="list-style-type: none"> • Ensure the design, monitoring and safety systems installed for the facility comply with established industry standards practice. Implement, audit and regularly improve HSE measures for emergency response to air pollution incidents during the operation phase.
Pollution from waste generation	<ul style="list-style-type: none"> • Develop and implement procedures for safe and appropriate disposal of waste for the all project phases.
Noise and vibration	<ul style="list-style-type: none"> • Implement measures during the construction, operation and decommissioning phases to prevent and manage noise and vibration.
Increased employment opportunities	<ul style="list-style-type: none"> • Implement where feasible measures to employ local. • Community members during both construction and operational phase.

FOR THE PROPOSED PETROL STATION DEVELOPMENT ON
PLOT L.R.NO. 631/1183, KERICHO MUNICIPALITY, KERICHO
COUNTY

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Shajanand Hardwares Limited) is proposing to develop a Petrol Station on Plot L.R.No. 631/1183, Kericho Municipality, Kericho County

The project will comprise of; Five pump isles (two for super, two for diesel and one for kerosene), Three underground steel petroleum storage tanks (USTs), A heavy duty covered man hole for each of the UPSTs, Service bay, Car wash bay, Compressor room, Generator room, Lubricant Mart, Oil receptor tank, Store, Changing rooms, Storm Water Drains, Canopy over pumps, Station shop, stores and offices, Air and water point, Sanitary facilities, a conservancy tank, Associated piping and wiring work, Parking bay, a four storey commercial block, with basement and a four storey residential block .

The following are the anticipated impacts and proposed mitigation measures:

Impact	Proposed Mitigation Measure
Solid waste	<ul style="list-style-type: none"> Reuse of construction debris will be encouraged. Separate waste appropriately to recover re-usable prior to disposal. A licensed private contractor will be engaged to appropriately dispose off all the solid waste that shall not have been reused on completion of the work. Train workers on risk associated to inhalation of dust and appoint at least one person to ensure proper dressing and waste handling by the workers. Provide workers with appropriate protective gears including nose and mouth masks. Appropriate bill of quantity will be prepared to minimize left over. Reduce the amount of waste generated by accurate budgeting to cut off on excesses that may expire before use.

soil erosion

waste management

Noise pollution

- Separate waste appropriately to recover re-usable prior to disposal.
- Ensure bins are erected appropriately, labeled and regularly being emptied and cleaned.
- Engage a licensed private contractor to appropriately dispose off on a regular basis the anticipated solid waste.
- Stage site clearance works so as to minimize the area of exposed soil at any given time.
- Re-cover exposed soils with grass and other ground cover as soon as possible.
- Temporarily bund exposed soil and redirect flows from heavy runoff areas that threaten to erode or result in substantial turbid surface runoff to adjacent drainage waters.
- Monitor areas of exposed soil during periods of heavy rainfall throughout the construction phase of the project to ensure that any incidents of erosion are quickly controlled.
- Leveling of the project site to reduce run-off velocity and increase infiltration of storm water into the soil.
- Building of physical barriers to prevent mass movement where necessary.
- The immediate surrounding area should be kept as clean as possible to enhance monitoring.
- Avoid soil extractions during rainy periods.
- A site waste management plan should be prepared by the contractor prior to commencement of building. This should include designation of appropriate waste storage areas, collection and removal schedule, identification of approved disposal site, and a system for supervision and monitoring.
- Preparation and implementation of the plan must be made the responsibility of the building contractor with the system being monitored independently.
- Special attention should be given to minimizing and reducing the quantities of solid waste produced during site preparation and construction.
- Any vegetation and combustible waste must not be burned on the site.
- Reusable inorganic waste (e.g. excavated sand/soils) should be stockpiled away from drainage features and used for in filling where necessary and/or possible.
- Unusable construction waste, such as damaged pipes, formwork and other construction material, must be disposed of at an approved dumpsite. Chemical waste should be handled as per their Material Safety Data Sheet (MSDS) requirements.
- Appropriate dressing of workers which will include: ear muffs / plugs.
- Maintain excavation equipment in accordance to manufactures specifications to ensure efficient

	<p>operation.</p> <ul style="list-style-type: none"> Noise and vibration will be kept at acceptable levels and construction/Excavation activities confined to normal working hours. Compliance to the environmental management and coordination (noise and excessive vibrations pollutions control) Regulations, 2009. Legal notice No. 61, 2009. Workers exposed to excessive noise and vibration –drivers of excavator - should work in shifts with frequent breaks to minimize long hours of exposure. Excavation activities to be limited between 8 a.m & 6 p.m. Use of appropriate cushioning for heavy equipment. 		
Air Pollution	<ul style="list-style-type: none"> Dampen work areas materials heaps and mulch bare ground to minimize dust emission. Maintain low speed in the rural access routes during transportation activities. Maintain equipment and machinery to manufacturer's specifications. Minimize period of machinery idling. Provide appropriate personal protective equipment to site workers. 		
Soil Aeration	<ul style="list-style-type: none"> Soil should be loosened up using ploughing techniques. Soil with cement or other construction contaminants should be treated appropriately to enable growth capacity. 		
Loss of terrestrial habitat & biodiversity – Re-vegetation	<ul style="list-style-type: none"> Protecting the existing individual vegetation as much as possible; and Set a replanting and landscaping programme that focuses on increasing "green area". The proponent will ensure proper demarcation of the project area to be affected by the construction works. This will be aimed at ensuring that any disturbance to flora is restricted to the actual project area and avoid spillover effects on the neighbouring areas. In the same vein, there will be strict control of construction vehicles to ensure that they operate only within the area to be disturbed by access routes and other works. Advice from relevant departments will be sought before clearing any major tree species if need arises. 		
Liquid Waste	<ul style="list-style-type: none"> Connect to KEWASCO sewer line. Advise tenants to install mini bins in rooms and advice patrons to only use soft tissue in toilets to avoid blockage of sewer line. Prompt unblocking and repair of stalled sewer lines. Channel storm water appropriately to avoid mixing and outburst of sewer. 		
Energy Loss	<ul style="list-style-type: none"> Install an energy-efficient lighting system in the building. Maximize on use of natural light during the day. 		
		Water Loss	<ul style="list-style-type: none"> Switch off all light and equipment when not in use. Use energy efficient cooking stoves and gargets to conserve energy. Purchase essential items in bulk to cut on the number of trips to stockers. Install water-conserving automatic taps, shower heads and toilets. Harvest rainwater from roof in an elevated tanks. Store adequate amount of water from the municipal supply. Promptly fix damaged/leaking pipes, faulty taps and associated facility within the building. Sensitize workers and patrons on need for efficient utilization of scarce water resources.
		Fire Hazard and Insecurity	<ul style="list-style-type: none"> Install firefighting equipment at convenient locations within the premise. Train employees on precautionary measures to avoid fire accidents. Fix damaged electrical systems and gargets promptly. Proper supervision should be ensured to avoid open fire. Fire disaster evacuation plan posters to be developed and posted appropriately. Provide for first aid facilities as per the OSHA. Ensure that the site is always guarded by a reputable security firm. Constant site patrol. Collaboration with existing security machinery. Partnership with neighbours and police in community policing.
		Oil spills and leakages	<ul style="list-style-type: none"> The potential contaminant source areas such as forecourt, pump islands, parking areas will be properly paved to contain oil spills from impacting the environment. The construction of the forecourt and parking areas will be done using reinforced concrete to avoid seepage of any fugitive petroleum spills into the soil system as well as draining the generated surface run-off into the oil/water interceptor.
		Electrical Safety	<ul style="list-style-type: none"> An emergency power control switch will be strategically installed in order to facilitate general power cut of the entire service station in case of emergency. An adequately stocked "First Aid Box" will be provided and the service station employees will be properly trained on how to administer first aid.
		Timber scaffolding and form support – forest depletion	<ul style="list-style-type: none"> The use of local timber should be kept to a minimum with such sources being approved by the relevant authorities such as Kenya Wildlife Service and the Forestry Service. Steel scaffolding should be used in preference to timber and the Contractor should ensure that sufficient quantities of scaffolding are available for hire at

- the time of construction.
- Materials stockpiling and storage
- The stockpiling of construction materials should be properly controlled and managed. Fine-grained materials (sand, marl, etc.) should be stockpiled away from any surface drainage channels and features.
 - Low perimeter berms should be placed around the piles of sand and marl and/or tarpaulin used to cover open piles of these materials to prevent them from being washed away during rainfall.
 - Safe storage areas should be identified and retaining structures put in place prior to the arrival and placement of material to limit fugitive dust.
 - Materials to be delivered on site in installments.
- Occupation Accidents
- Ensure warning signs on road safety are erected at appropriate location during excavation and transportation.
 - Speed limit of transport vehicle to be kept low.
 - Personnel training on workforce safety
 - Control access to working sites- Secure the work area.
 - Plan stabilization and evacuation of the injured.
 - Liaise with the district Occupation Health and Safety department to provide for appropriate induction training and regular updating of workers skills on occupational health and Safety matters.
 - Provide for appropriate signage and warnings at work site.
 - Use personal protective equipment (PPE) to workers and any visitors.
 - Provide for first aid facilities as per the OSHA.
 - Provide and clearly display emergency contacts.
 - Develop and implement a detailed and site specific emergency response plans.
 - Firefighting emergency response plan to be prepared.
 - Ensure availability of a loaded firefighting equipment.

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY
ENVIRONMENTAL IMPACT ASSESSMENT STUDY REPORT
FOR THE PROPOSED SUPPORT TO AND EXPANSION OF
MALINDI BIO FUEL CLUSTER-JATROPHA FARMING
PROJECT

INVITATION OF PUBLIC COMMENTS

PURSUANT to regulation 21 of the Environmental Management and Co-ordination (Impact Assessment and Audit) Regulations, 2003, the National Environment Management Authority (NEMA) has received an Environmental Impact Assessment Study Report for the above proposed project.

The Proponent (Comitato Internazionale Per Lo Sviluppo Dei Popoli) is proposing to expand the Malindi Bio Fuel Cluster-Jatropha farming Project in Mida Sub-location in Gede Location, Mijomboni Sub-location in Gede Location, Kakuyuni Sub-location in Goshi Location and Marikebuni Sub-Location in Magarini Location (the first three clusters are in Malindi District while the latter is in Magarini District) in Malindi and Magarini Sub-.

The project entails the establishment of *Jatropha curcas* as a hedge by 1200 farmers organizing them in SHG found in four clusters in Mida, Mijomboni, Kakuyuni and Markebuni areas of North Constituency, Kilifi County. Although the core business of the proponent will be to skill the local farmers establishing *Jatropha* Plants as a live fence around their farms and later harvest the seeds for oil production, and briquette from biomass, the growing of other food crops will continue on the same piece of land un-interfered, all these will take place without destruction of the native vegetation

The following are the anticipated impacts and proposed mitigation measures:

Impact	Mitigation Measure
Impact on biodiversity along the farm boundaries	<ul style="list-style-type: none"> • Site specific preparation for <i>Jatropha</i> planting. • Selected farms should have few trees along their boundaries to avoid any felling down of indigenous trees. • Farmers to use existing fallow areas to plant <i>Jatropha</i>.
Invasiveness	<ul style="list-style-type: none"> • Close monitoring of the plant growth throughout its life cycle by researchers. • Transportation of seeds in closed bins. • Remove and burn <i>Jatropha</i> plants and seeds.
Host to diseases	<ul style="list-style-type: none"> • Remove all infected cassava or other host plants from within and around sites to be used for new plantings. • Use virus-free stem cuttings for all new plantings. • Encourage farmers to get materials available on the farms and KARI Msabaha station. • Remove diseased plants from within crop stands (rouging) Continuous research work.
Health hazards to man	<ul style="list-style-type: none"> • Clearly label <i>jatropha</i> products as "Not fit for human consumption". • Sensitization of farmers on the dangers of the plant. • Research work on how to overcome the hazards. • Farmers advised to take care of their children's safety.
Health hazards to livestock	<ul style="list-style-type: none"> • Farmers to be advised not to use JSC as animal feed. • Awareness creation. • Natural mitigation- <i>jatropha</i> is hardly fed on by animals.
Solid waste management	<ul style="list-style-type: none"> • Take un-reusable plastic bags to a

- recycling plant.
- Make eco-charcoal from JSC waste.
 - Make compost from other organic wastes.
 - Reuse plastic bags.
- Demoralization of farmers
- Education and awareness.
- Resentment from people
- Education and awareness.
 - JGA constitution to allow inclusiveness.
- Conflicts within JGA
- Constitution to be adhered to strictly.
 - Proponent to monitor Association's activities.
 - Project stakeholders to mediate and reconcile group members.

**IMPORTANT NOTICE TO SUBSCRIBERS TO
THE KENYA GAZETTE**

THE following notes are for the guidance of persons submitting "copy" for inclusion in the *Kenya Gazette, Supplement*, etc.:

- (1) *The Kenya Gazette* contains Notices of a general nature which do not affect legislation. They are, therefore, submitted to the Government Printer directly.
- (2) *Legislative Supplement* contains Rules and Regulations which are issued by the Central Government. Because of this, they must be submitted to the Government Printer through the office of the Attorney-General.
- (3) *Bill Supplement* contains Bills which are for introduction in the National Assembly.
- (4) *Act Supplement* contains Acts passed by the National Assembly.

All "copy" submitted for publication should be prepared on one side of an A4 sheet no matter how small the Notice is, each page being numbered and should be typewritten with double spacing. Copy should be clear, legible and contain no alterations.

Particular attention should be paid to the following points:

- (i) Signature must be supported by rubber-stamping or typing the name of the signatory in capital letters.
- (ii) must be correct and filled in where necessary.
- (iii) Care should be taken to ensure that all headings to Notices and references to legislation are up to date and conform with the Revised Edition of the Laws of Kenya.
