THE ENVIRONMENTAL MANAGEMENT AND

CO-ORDINATION ACT

(No. 8 of 1999)

THE NATIONAL ENVIRONMENT MANAGEMENT AUTHORITY

DRAFT REPORT FOR STRATEGIC ENVIRONMENTAL ASSESSMENT (SEA) FOR THE MOMBASA CITY GATE MASTER PLAN

INVITATION OF PUBLIC COMMENTS

IN LIGHT of the provisions of section 57 A of the Environment Management and Co-ordination Act (EMCA) Cap 387, Regulation 42 and 43 of Environmental (Impact Assessment and Audit) Regulations, Legal Notice No. 101 of 2003, the National Environmental Management Authority (NEMA) has received a Draft Strategic Environmental Assessment Report for the Mombasa City Gate Master Plan. The SEA findings are expected to integrate the existing sectoral plans and programs to establish sustainable economic zone development mechanisms.

County Government of Mombasa is the PPP owner. The objective of the MGC MP is to formulate a Comprehensive Master Plan for the Mombasa Gate City including implementation and management program, and prioritize intervention areas/flagship projects through collaborative work with Mombasa County Government and concerned organizations. The MP will cover the entire Mombasa County, of a total area of 287 sq. kilometres consisting of 222 km² land area and 65 km² of water. However consideration will be taken of the surrounding areas that are closely relevant to appropriate development of the county.

The MGC MP seeks to address the following challenges: shortage of affordable and quality housing, especially for low and middle income households, limited tourism products, insufficient sewerage infrastructure and other urban services, poor linkage of road networks resulting into port related traffic congestion, inadequate basic education facilities, inadequate health service delivery points and growth of informal settlements among others.

The plan covers nine tasks, namely: 1) Understanding of current situation and issues (situational analysis), 2) Formulation of development vision, 3) Establishment of social and economic framework, 4) Formulation of structure plan, 5) Formulation of land use plan, 6) Formulation of strategy of infrastructure development, 7) Selection of priority areas and projects, 8) Preparation of Draft Master plan, and 9) Strategic Environmental Assessment (SEA)/Stakeholder Consultation. From the urban planning perspective and environmental concerns the plan has taken into consideration green transport solutions such as provision of Non-Motorized Transport (NMT) infrastructure through proposal for construction of pedestrian paths and cycling lanes as approaches to reduce the impacts of climate change.

The specific objectives for this SEA Study are:

- Ensure that the Master Plan is compatible with sustainable planning and environmental management.
- Enhance the consistency of the Master Plan across different Policy.
- Plan, or Program (PPP) sectors; Identify the potential environmental, socioeconomic and cultural impacts of the Master Plan.
- Support decision-making and incorporate emerging environmental issues into sustainable development.

Key environmental and social impacts and mitigation measures.

*Environmental aspects Detailed priority areas of concern**Water quality*

- Lack of sufficient water supply to ensure good sanitary conditions in Mombasa. The City heavily relies on water from outside the County e.g. Mzima springs, Baricho Wellfield, Marere Springs and Tiwi Wellfield.
- Inadequate sewer line with Mainland South totally lacking sewerage system.
- Vulnerability to floods given that storm

- water drainage only covers 10% of the total planning area.
- Pollution of the sea and beaches especially leachates (polluted water) polluting the sea from Kibarani dumping site and the defunct Kipevu waste treatment plant.
 - Little concentration on water resources (the blue economy) – water resources have not been exploited despite potential such as water transport, use of desalination to alleviate water shortage etc.
- Air quality**
- Emissions from vehicles (mixture of urban function and logistic function, particularly Changamwe and Jomvu areas where airport, port, CFS, industry, warehouse and residential function are mixed. Heavy traffic generated from and to port is the main cause of traffic congestion and air pollution which is considered as a disturbing factor for the local people).
 - Dust from poorly maintained roads.
 - Poor linkage of road network and land use.
 - Health risks for residents from air pollutants.
- Solid waste management**
- Increased solid waste generation and poor management.
 - Lack of waste recycling facilities.
 - Land/soil contamination from chemicals
 - Foul odors from waste – some waste collection points are located close to residential areas.
- Biodiversity conservation and protected areas**
- Threat to sensitive natural and cultural heritage sites such as the Mombasa Marine Park, Mangrove Creek, Kaya Forests, Old Town, Fort Jesus and Mbaraki Pillar etc.
- Landscaping**
- The transformed built environment will change the mobility system of the city - this was in line with the proposed Likoni bridge.
 - Urban sprawl and expansion of uncontrolled urban development.
- Socio-economic issues**
- Inadequate social amenities (schools, health facilities, children play ground, recreation facilities, football field, entertainment, social halls) as a result of the anticipated population increase.
 - Limited employment opportunities in the county especially for women and youth.
 - Low community participation in development activities.
 - High crime, insecurity and other antisocial behaviors that is also likely to increase as a result of the anticipated increased population.
 - Fear of evicting slum dwellers to pave way for other development.
 - Possible displacement of persons currently leaving on land earmarked for different functions.
 - Poor road, water and electricity infrastructure in the county.
 - Limited land area for future city expansion as a result of the rapid population growth and the sea to the East.

- Reduction of unemployment in the city by attracting more investors
 - Provision of adequate social amenities such as schools, health facilities and community halls.
- Human settlements and cultural issues**
- Improve and upgrade level of services for various facilities such by easing the urban function from the island by adopting multi-core urban development as a basic structure.
 - Reduction of negative impacts of wastes on the health of the people and the environment by improving waste management at Kibarani and Mwakirunge dumping site and need for a sanitary land fill.
 - All key stakeholders including the poor, physically challenged, youth and women should be involved in the development and implementation of the Mombasa City Plan.
- The protection and conservation of scenic beauty and the protection and conservation of the built environment, and historic or cultural significant areas.**
- Enhancement of landscape resources.
 - Protection and conservation of cultural heritage such as Fort Jesus, Old Town, Mbaraki Pillar, Mackinnon market, Kengelani and Kongowea market and any other additional sites which will be identified as having significant cultural position by the stakeholders.
 - Consideration of design works of the built environment.

The full report of the proposed project is available for inspection during working hours at:

- (a) Cabinet Secretary, Ministry of Environment and Mineral Resources, NHIF Building, Community, P.O. Box 30126-00100, Nairobi.
- (b) Director-General, NEMA, Popo Road, off Mombasa Road, P.O. Box 67839-00200, Nairobi.
- (c) County Director of Environment, Mombasa County.

The National Environment Management Authority invites members of the public to submit oral or written comments within thirty (30) days from the date of publication of this notice to the Director-General, NEMA, to assist the Authority in the decision making process of the plan.
