Sludge drying beds will be paved to prevent infiltration. Multiple aeration basins will be installed in the plant to manage overflowing problems. Drains and bypasses shall be designed for emergency cases. A standby pump should be in place in the event of failure of the primary pumps.
Pollution of groundwater	<ul style="list-style-type: none"> Monitor water quality in the adjacent to rivers and implement mitigation measures if necessary. A water quality monitoring program shall be in place to detect any contamination in WWTP. A groundwater quality monitoring program must be in place to detect any contamination that may be linked with the treatment plant Treatment of wastewater to meet wastewater quality standards as set by Water Quality Regulations, 2006. Six-monthly groundwater quality testing at two boreholes: directly upslope and directly down slope of the sewage plant.
Fire hazards	<ul style="list-style-type: none"> Prepare and implement a Fire Hazard Response Plan. Label all inflammable materials and store them appropriately. Use of retardant material in installation works of WWTP. Install fire Suppression Systems such as Sprinkler system, hose reels, Dry risers (hydrants) and portable fire extinguishers.
